“Stella Dallas”

With RONALD COLMAN, BELLE BENNETT, ALICE JOYCE, JEAN
HERSHOLT, LOIS MORAN, DOUGLAS FAIRBANKS JR.

She is found in every city, town and village. Belle Bennett portrays the love life of this girl so deftly, deeply, that you love her despite her weakness, pity her despite errors, weep with her as she is rejected and rejoices, and as she suffers—all because her share of the heart, and of the head, alone. A tremendously big romantic drama as new as tomorrow, as old as time and as sympathetic as a mother's caress. Stella Dallas couldn't guide her own heart, but will rule yours in the story of her love life that will stir the souls with its human thrills.

Also Chapter 7 “The Collegians”
and Paramount News.

Coming Next Week--Wallace Beery
and Raymond Hatton in
“Now We're in the Air.”

OBITUARY

Mrs. Elizabeth Brown, beloved wife of James Brown, passed away at the Holy Cross hospital Thursday Jan. 19th, after a short illness. Mrs. Brown took sick Friday evening Jan. 13, and gradually grew worse until it was deemed advisable to remove her to Calmar for further treatment. Her condition did not seem very critical upon entering the hospital but shortly after arrival she collapsed and passed away suddenly, death coming as a very great shock to the family and immediate friends. Born in Swinton Lancashire, England, in Aug. 1876 she emigrated to Canada with her husband and family, settling in Stavely, Alberta, in Aug. 1908, homesteading in the Champion district where they moved in the fall of 1913. Those left to mourn her loss are her husband and small son in Champion; three daughters, Mrs. Oscar Wollen of Douglas, Wash.; Mrs. Geo. Money of Calgary; Mrs. A. H. Davis of Wenatchee, Wash.; her father Edward Halstead and three brothers and three sisters in England, Mrs. Geo. Taylor a sister residing in Champion and one brother and one sister in Calgary.

Following is a list of the beautiful final offerings: Mr. and Mrs. A. G. Whitman, Bessie and George, Daddy and Jimmie; Father, three brothers and three sisters, England; Mr. and Mrs. J. D. Campbell, the Cleverlyville Pioneers; Mr. and Mrs. G. A. Winkler, Mr. and Mrs. F. W. Elks' Lodge; Mr. and Mrs. F. J. Clapp and Mrs. Fields; Uncle Tom and Sons, Mr. and Mrs. Robt. Miles Groomcock, Mr. and Mrs. Tom Elks, Mr. and Mrs. H. E. Gill and Mrs. Horace Gill and Howard Gill; Mr. and Mrs. Otto Milice, Mr. and Mrs. Geo. Taylor; Deborah, Arthur, Mary, Oscar and families; Mr. and Mrs. Vernon Wright.

Mr. Henry Smith wishes to acknowledge the kind words from Champion on the passing of the family of his late wife, Mrs. Rhoda Smith—Smith, Farnell, Cleverlyville Club, Mr. and Mrs. F. W. Elks' Lodge, L. D. S. Sunday School; Ic Grevs, Geo. Depue, J. M. Moffatt, Sam Jopling, H. E. Gill, H. A. Hopkins, H. E. Gill and G. M. Campbell.

J. O. Reid, of Airdrie, is renewing old acquaintances here this week.

A. Baker attended the Lethbridge bisonip with a Carman-gay bonspiel.

T. R. Jopling will undergo another operation shortly at the Holy Cross hospital, Calgary.

Mr. Thorriault's sale was the center of attraction for the ladies at the opening on Saturday.

Geo. Lobban, of Huxley, Alta., was in town on Wednesday, leaving for Calgary en route home on Wednesday night.

Mrs. Comunini, of the Savoy hotel, has been ill practically since her arrival here. Nurse Hood of Carmangay was in attendance.

Mrs. Geo. Taylor, wished to thank the many friends who came so kindly to her assistance during the illness of her sister, Mrs. Jas. Brown.

Invitations are out for the annual meeting of the Cleverlyville Club, February 3rd having been selected for this event. A big evening is promised.

Everyone should remember the date of Mrs. Nellie L. McClung's visit—Feb. 20. An opportunity to hear Mrs. McClung is to good a thing to be missed.

The Ladies' Aid met at the home of Mrs. P. O. Sommers on Thursday last with a fair turnout of ladies. The next meeting will be held at the home of Mrs. B. Woodhull on Thursday, Feb. 2.

Champion Audiences Hear Noted Speaker

Champion Elks are to be gratified on the success of their first community effort in bringing Capt. Daneyce here on Monday, Jan. 23rd. This noted speaker delivered four addresses during the day of his visit,—High school at 10:30, Board of Trade luncheon at 12:30, Women's Institute at 2:00 and a community gathering at 8:00 p.m. It is a matter of regret, however, that space would not allow us to reproduce the matter contained in these addresses. Capt. Daneyce is a fluent speaker and held the attention of his audience from start to finish. His outstanding plea was for better education, stating that some 98 per cent. of our citizens talked on subjects of which they had not the slightest knowledge, and that elimination of ignorance would finally result in the easy solution of most of our problems. Campbell's hall was too small for the evening meeting and it is to be hoped at a later date Capt. Daneyce may be here again when more commodious premises are available. Music by the local orchestra and community singing were special features of the evening meeting.

James Brown and family take this means of thanking their many Champion friends for their expressions of sympathy and for the many beautiful cards and flowers forwarded for the funeral of the late Mrs. Jas. Brown.

The Helping Hands, CHELT, group, wish to announce that they will have an open meeting in the church on Friday night, Feb. 17, at 7:30. A short programme will be given. Admission 10c.

A very successful skating party was held on Friday night by the C.G.I.T. After skating the girls adjourned to the church, where refreshments were served by Mrs. Hunt.

Mrs. Ada Williamson entertained a number of girl friends to a birthday party on Friday evening. Mrs. H. Johnson assisted Mrs. Williamson for the occasion.

J. M. Pharis is reported to be making satisfactory progress at the hospital in Calgary.

NOTES AND COMMENT.

A movement in the United States against the candidacy of Al Smith for the presidency, on account of his religious belief, is credited with forming the basis for the introduction of a third party in the republic to the south.

The banishment of Leon Trotsky to Siberia removes one of the outstanding figures of the Russian revolution. His departure passed almost without comment in Moscow. How easily the great disappear from the front page of world events.

The past year has been an extremely successful one for the Pontiac six, and the fruits of this success are seen in the new series Pontiac, announced this week, which incorporates numerous refinements and improvements not found in any other car. The four models are the above sedan, the graceful lines of the new car. At the upper left is the "T" type sedan and at the upper right the rakish new sport roadster, with its convenient folding seat. A head-on view of the roadster, showing the deep, narrow radiator and two of the four-wheel brakes, appears in the centre panel. At the lower left is the beautiful coupelet and to its right the new four-door sedan.

Sale Of Forest Products Is Big Factor In Keeping Trade Balance With U. S.

Canada's far flung line of forest industries is one of perhaps the most striking factors of the Dominion's industrial landscape.

Only when one realizes what an enormous volume of commerce these forest industries support, and what a dominant role they play in keeping Canada's balance with the United States on a fairly even keel, can one fully appreciate what a huge state the Canadian people have in forest protection.

These hundreds of miles together form the main supporting pillars of Canada's export trade with her neighbors to the south. The mounting sales of forest products alone have enabled the Dominion in recent years to recover from the depression and remain interested in seeing that the Dominion's commercial position is maintained on an even keel.

wood and paper products, this class of goods representing more than half of the total value of our exports to that country.

How long Canada can continue to export forest products at such a rate is a question which few persons would care to try to answer, for there is a pretty unanimous agreement that the steady and rapidly depleted.

In this situation, efficient forest protection and management must take rank next to Canada's control of its resources. This is a concern which commands the active concern not merely of those who employ men in forest industry, or of those whose capital is invested in that field, but every individual and institution interested in seeing that the Dominion's commercial position is maintained on an even keel.

Television and Radio

New Perfected Device Makes It Possible To Both See and Hear Performers

The magic wand of science, passing over the factory of the General Electric Company, Schenectady, N. Y., disclosed to a small group of radio engineers, scientists and newspapermen, a vision of the future of radio broadcasting—a future designed to bring to broadcast fans the sight as well as the sound of the radio performers.

Sitting in comfortable chairs in three Schenectady homes, several miles from the company's broadcast studio, the visitors were enabled both to hear and to see the radio program.

Simple twists of the dial on the receiving sets caused the visitors to see the minute reproduction of the characters who appeared before the microphone, even to the curl of cigarette smoke from their lips and the blinding of their eyes.

The sound of their voices was heard in the usual way through the speaker supplementing the visual appearance.

WILL TRY OUT NEW WHEAT

Reward Will Be Offered By Saskatchewan and Alberta

Farmers

Experimenters in cross-breeding of wheat of different varieties that are carried on by experts on the staff of the Department of Agriculture of Canada have produced still another strain that is declared to be suitable for growth in the prairie provinces of the Dominion. This new strain, known as the Quebec Chronicle-Telegraph, is known as Reward wheat. It has been revealed that the sample of wheat with which the Manitoba Agricultural College was furnished to the Royal Winter Fair in Toronto was of the Reward variety. And, more recently, Hon. W. B. Motherwell, Minister of Agriculture, has disclosed that he which Mr. Herman Trebil of Weyburn, Alberta, won a first prize at the International Exhibition in Chicago was of the same variety.

It is estimated that a thousand bushels of the new wheat have been distributed to some four or five hundred farmers in Saskatchewan and Alberta to be tested under farm conditions and no doubt to be multiplied, and that later on when it may be available as seed next year.

The new wheat has been subjected to certain tests already on experimental farms, on the experimental plots of agricultural colleges and to some extent on farms of various seed growers. These tests are said by Mr. Motherwell to have shown that Reward has the strongest straw of possibly any known wheat, that it ripens earlier than Marquis wheat, and that it is more resistant to Gart, that is, it is less liable to run or blight, than any other variety, and that it yields a flour without spot or blisters."

Reindeer Industry

Company Leases Big Area In McKenzie River Territory

Reindeer meat may find its way to the dining rooms of Western Canada if the plans of the Canadian Fur Company are successful. This organization, which is now actively engaged in the reindeer business in Alaska, is moving 4,000 fawns from the spring to the end of 30,000 acres in the McKenzie River territory which is controlled by the Federal Government. It is estimated that sales of reindeer meat in 1929 will be \$9,000, increasing to \$40,000 in the following year.

The deer devours hundreds of insects in a day, and millions in a lifetime. Millions of birds devoured—too many to solve, but at any rate, there seems to be overcome the insects that remain.

Worth remembering, isn't it? Particularly when the rifle of the small boy is pointed toward one of our feathered friends.

An All-British Airship

An airship firm here announces its intention of building a machine which it is hoped will be the first absolutely all-British airship to fly over Canada.

It will be able to carry 30 passengers in addition to a crew of six or ten. Its flying range will be 1,500 miles and it will compass the Atlantic by calling at the Azores.

Plan Industries Fair

Everything Made In Great Britain Will Be Exhibited

Almost everything Great Britain makes, from huge electrical equipment to the smallest article of domestic use, will find its way into the British Industries Fair, which is to be held simultaneously in London and Birmingham from Feb. 20 to March 2, 1928.

The aim of the organizers is to make each section thoroughly representative of its own branch of British industry and to establish the fair more firmly as an annual commercial event of first class importance.

It is the intention of the organizers to launch new products and establishing new contracts, the trade buyer's means of keeping in touch with the latest developments in British production and of taking a complete survey of that section of it which interests him most without having to make a tour of the country.

Ship Live Cattle To Japan

Forty Head Outshipped In Alberta Were In Prime Condition

Shipments of dressed beef in the half or quarter carcass have been exported to Japan from Vancouver for several years past, and the animals are now being sent to the market.

But what has been done up to now has been made possible by the fact that

the animals have been sent to Japan in the winter months.

But the animals have been sent to Japan in the winter months.

WORLD HAPPENINGS
BRIEFLY TOLD

Clarence Chamberlin's third attempt to capture the world's duration flight record failed when he was downed by low flying on the wings.

Execution of Washington of a memorial statue of Samuel Gompers, former president of the American Federation of Labor, is proposed under a bill introduced by representative George W. Gandy.

Estimated for more than twelve hours by a nail of coal in a level hundred of feet beneath the surface, nine miners at Hazleton, Pa., were rescued from their prison and brought out of the mine after a month.

The King of Abyssinia, Haile Selassie, Emperor of Ethiopia, and Governor-General of South Africa, which began in 1924, will be extended for two years from Jan. 21, 1928, at the special request of the South African Government and with the approval of the King.

W. G. F. MacLean, by Paul Veronese, a picture which exhibits the work of the great Venetian painter in the first flush of his maturity, about the year 1558, has been purchased by the Canadian National Gallery.

The Alberta Wheat Pool has awarded a contract to the Northern Construction Company, Ltd., and J. W. Stewart, Vancouver, for its terminal elevator at Vancouver, same to be completed in 1929, at a cost of approximately \$1,000,000.

One shot, the oldest Indian on the Blood Reservation and the only remaining Indian that signed Treaty No. 7 in 1877, died at his home on the Blood Reserve near MacLeod, Alta. He was 80 years of age and was buried near his home at the old agency on the reserve.

The official Gazette announces that the king has made Baron Byng of Vimy, the Canadian governor-general of Canada, a chevalier. Vimy has received this honor in his 65th year, after an active military career which ended with the close of the war. He was governor-general of Canada from 1921 to 1926.

Air Route Via Yukon

Great Northern Airway is Predicted By Dr. Thompson

The Yukon will some day be one of the main air routes of the world, providing an airway between Asia and Europe, and the prediction of Dr. Lester Thompson, former minister of pilgrimage for the Yukon, comes true.

The airway will be routed through the Northern part of British Columbia or the Yukon to the Aleutian Islands," said Dr. Thompson. "With Siberia in the north and China opposite the Philippines Islands to the south, the route will be free from fog, wind or snow. Airships will probably be the main means of travel, and stations will be established in the number months in the Yukon when the rivers are open.

Future of the North

The Hudson's Bay Railway is an absolute necessity to the north country, states Senator H. C. Gandy of North Bay. "Even were it not possible to transport grain over the railroads," he said, "it will still be an enormous factor in opening the mining country." He advised young men today to go north, where the future of Canada, to a great extent, lies.

Time was when banks occupied all the best corners in our town and cities, but service stations seem to dominate them now. Perhaps that indicates where the money is going.

Foresees Atlantic Air Service

Dominion Secretary Predicts Edinburgh Will Be Northern Depot

The Rt. Hon. L. C. M. B. Amery, British secretary of state for Dominion Affairs, foresees the day when Edinburgh will be the northern depot for a great British air line service across the Atlantic, north through the Peace River Country and across the Rockies to Vancouver.

It is not generally realized," he said, "that the development of an air line across the Atlantic will show it, that Churchill is as near to London as is Montreal; that Edinburgh is as near to London as is New- oronto, and that practically all of Canada is nearer to London than is New-

foundland.

Experimental air line service will be commenced in the summer stated Col. Amery, but it will be three or four years yet before there is a regular air line across the Atlantic. He believes there is yet to be much advancement in measuring air distances for such a comparison of distances as the fog, the feasibility of an all year air cruise of the dangerous and forbidding waters of Iceland and Greenland.

Passenger and mail service will first be developed, followed by the carrying of precious cargoes such as gold, which insurance charges are extremely heavy for each hour of transportation.

One huge airship is being built by the British air ministry for commercial and military tests and another for passenger and criminal work is being built by Col. Dunay for a private company.

Wireless For the North

Wireless sending outfitts which will be installed individually by telephone interests at Fort Garry, Fort Chipewyan, Fort Lake, Manitoba, will be capable of sending messages for more than 150 miles. Messages can be received from much greater distances. One of the sets is to be put up at The Fort and the other at the headwaters in the northern ore field. A wireless sending outfit is already in use at the File Flion mine.

Receives New Appointment

A. Ledingham who was recently appointed assistant general freight agent of Western Lines of the Canadian National Railway with headquarters at Winnipeg, Manitoba, and London, Ontario, prior to his recent appointment, was city freight agent, joined the services of the Canadian Pacific in 1907, and has been identified with the freight department since that time.

Mr. Ledingham finds its source in Maligne Lake about thirty-five miles from its confluence with the Athabasca River, about a mile wide. This lake is the largest national playground in the world. The name is derived from the Athabasca Indians who, in former days, used to live in the Canadian Rockies. From this lake to Maligne Lake flows swiftly down hill for about ten miles to empty into Medicine Lake, a water four miles long and from a half to a mile wide. This lake has many places, reaches a depth of 150 feet.

Out of this lake there is no known outlet. At the foot of it and for a mile or so below there is the dry course of what was once a river. But this bed is dry and there is neither sight nor sound of water. The lake is about a mile, a triad of water making its appearance and within a comparatively short distance a river is once more flowing through the valley.

This is again the Maligne River, although it is now a stream. At the head of the basin, the volume of water is about as great as that which flows into Medicine Lake. A mile above the Athabasca River, the Maligne turns down into a green canyon, hundreds of feet deep and, in places, only a yard wide at the top.

London-Dublin Air Service

Would Cut Journey From Ten To Four Hours

An air service probably will be the result of negotiations now in progress between Imperial Airways, Limited, and the Air Department of the Irish Free State. Passengers would fly from London to Liverpool, and from Liverpool to Dublin, where they would change from land-plane to a 15-passenger flying boat. The serial journey should be accomplished in about four hours, compared with ten hours by boat and train.

Some people are proud of their past—probably because it is past.

U.F.A. MAY SPLIT WITH COUNCIL OF AGRICULTURE

Calgary.—Early severance of relations between the United Farmers of Alberta and the Canadian Council of Agriculture loomed as a possible development in the passing of a resolution at a session of the United Farmers of Alberta convention, following presentation and acceptance of a report on the year's activities of the council.

The resolution, which was introduced at the suggestion of H. W. Wood, president of the U.F.A., instructed the secretary of the organization to prepare a report containing recommendations as to the future relationship with the Canadian Council of Agriculture and to reveal its findings at the annual convention of the organization.

This recommendation was submitted as a substitute for another resolution which urged the immediate creation of a committee with powers to enter into negotiations with other provincial farmers' organizations in an effort to bring into being a new central body.

Following brief discussions by a number of delegates in which the merits and shortcomings of the Council of Agriculture were weighed, Mr. Wood was appealed to for advice.

The president admitted that to counsel the organization on a question of this nature was a difficult task, and the "tearing down" of another agency was a serious task.

"Personally I don't think the Canadian Council of Agriculture has produced much in the way of progress," Mr. Wood declared. "Some believe this is due to the fact that certain commercial organizations are connected with it. I very much doubt whether that is the primary cause. I am more inclined to believe it may have something to do with its personnel."

"I made up my mind about three years ago that the council could not be of sufficient benefit to the movement to warrant my attendance at its meetings," Mr. Wood added.

The veteran leader warned the delegates it would be better to leave things untouched rather than to precipitate the movement into greater confusion.

Served In South Africa

Duke Of Richmond Dies At Home In England

London.—Charles Henry Gordon-Lennox, Duke of Richmond and Gordon, and aide-de-camp to King George V, died at his home, Godwood House, Chichester, after a brief illness. He was 82 years old.

The Duke of Richmond and Gordon served as aide-de-camp to Queen Victoria, King Edward VII, and King George V. He was a member of parliament and was a colonel in the Fusiliers regiment. He was Lord Lieutenant of Elgin and Banff, and had been chancellor of Aberdeen University since 1917.

He served in the South African War and was mentioned in despatches.

Television Established

London.—Television already has been successfully demonstrated between London and New York, according to L. G. Hutchinson, director of the Baird Television Company. Prior to sailing on the Aquitania for New York, Mr. Hutchinson said the first test broadcast had been in progress for six weeks and that recently "control" with New York was made on several occasions, it being possible to see the faces and hands of individuals, although the features were indistinct.

Would Safeguard Public

Toronto.—That definite results followed United States legislation prohibiting the sale of cigarettes by unqualified persons was the statement of Dr. Leo Mayer, president of the Association of Optometrists of America, speaking to the Ontario Association here. He advocated that Canadian legislation be strengthened to have similar measures adopted as a safeguard to the public as well as a benefit for qualified opticians.

Millions For Manitoba

Winnipeg.—More than \$120,000,000 came to Manitoba in the form of field crops for the fiscal year ending April 30, 1927, according to the annual report of the department of agriculture placed before the legislature by Hon. A. P. Prentiss, Minister of Agriculture.

W. N. L. 1717

Spies Are Convicted

Two Men Convicted In British Espionage

London.—An Old Bailey jury convicted two of trafficking in British colonial military secrets and the interests of Soviet Russia and dealt a heavy blow to what the prosecution termed "a dangerous spy organization" operating against the safety of Great Britain.

Winfred Thomas McCutcheon, usually described as an Englishman and an Irish-American, and George Hanson, a youthful German, were sentenced to ten years' penal servitude on their conviction.

McCUTCHEON, formerly of London, the chief spy and Hanson his aide, in obtaining and communicating information useful to opponents of Great Britain in warfare. While admitting the espionage organization had been trapped, Attorney-General Bogg declared the activities of the arrested men had been halted before material damage could be done.

Testimony by the Lord Chief Justice said the accused had been convicted of "treasonable" for trafficking in official secrets for gain, unimpeded by any thought of serving their own country.

Want More Price Money

Would Have Exhibition Boards Boost Priests For Shorthorns

Regina.—Calling upon the Saskatchewan and Regina exhibition boards to increase the prize money for the Shorthorn classes at the two summer fairs, delegates to the annual meeting of the Saskatchewan Cattlemen's Association here expressed appreciation at what had been done for them in the past. It is with the desire to encourage the small breeder to show at these summer fairs that the boards will be asked to increase the money prizes for Shorthorn bred and owned within the province.

John Brandt, Elderslie, was re-elected as president, with Mr. A. G. Hopkins, Saskatoon, as vice-president, and Chas. Hartson, Belle Plaine, as secretary.

Reports from the secretary and president indicated the new club is to be a success, and that there is a great interest in the breed developed in the province.

No annual sale will be held this coming fall, as it has been found that weather conditions prevent a large number of breeders attending.

May Study At Scotland Yard

Winnipeg.—The Provincial Government and the city of Winnipeg are to send a second scientific section of the provincial and city police forces to England to take advantage of a special course of instruction to be given at Scotland Yard at the invitation of Old Country authorities.

Beer By The Glass

Toronto.—The Ontario Legislature will open in three weeks, and according to The Toronto Star, it is possible the question of sale of beer by the glass may be a live issue at the session.

Preparing For British Election

Toronto.—The Conservative party are very much interested in a rumour that a general election is planned by the Conservative party organizers for the end of this year. The attitude of the Liberal and Labor parties is "We Prepare." Both parties, however, are busily engaged in preparing for the election.

MANY WESTERN MATTERS ARE TO BE DEALT WITH

Western matters will be considered in the legislation of the forthcoming session of parliament. There will be a large additional vote for the Hudson's Bay Railway, and the anticipated agreement in regard to regulating the policing of Saskatchewan. Legislation may be required, although it may be effected by order-in-council. In any event, the subject will be before the House.

Alberta and British Columbia also figure in the sessional program and in defining the boundaries of national parks in Alberta. An agreement on long standing points of dispute will be sought.

The review of boundaries made in the last few months paves the way for the final settlement in the parks which the Dominion proposes to retain will be the scenic beauty, leaving to the province the water powers and minerals to a large degree. The Dominion Government is to be given the right to take over others powers from the provinces, along with the principal coal fields, providing it is guaranteed against future claims by the province respecting any mineral deposits which may be found in the coal fields of the provinces.

Meanwhile, in regard to the latter question, there are no new developments. Conferences on the subject last week between Premiers King and Brownlee are expected to result in a bill between the two provinces when the latter has consulted his colleagues. The Dominion Government is desirous of having the constitutional issue decided before the provinces are prepared to return the mineral rights, but difficulty has been encountered in getting the case before the Privy Council without some new intervention. The obstacle arises from the legal procedure of the federal government in appealing a judgment in its own favor.

In regard to British Columbia's case for better terms a report from Mr. Justice MacLennan, president of the Provincial Board of Education, and about 50 Indians will be brought here this year for placement on farms in the Province, Hon. A. Prentiss, Minister of Immigration, has announced.

Meanwhile, the boys will be placed at Manitoba Agricultural College where they will receive training in agriculture to fit them for world.

New Ruling At Ottawa

For \$25-30 New Charged At Parliamentary Accents

OTTAWA.—Before a parliamentary committee can appear before the House of Commons to promote or oppose any private member's bill, it must pay a fee of \$25 and secure the signature of the Speaker of the House.

This is contained in a new ruling.

Now there are nearly 30 such measures on record, and proponents and antagonists alike, aside from members of the house will have to conform.

At last, the consideration of these recommendations, the systems of grain inspection and grading now in vogue in Canada were explained in exhaustive detail by J. D. Fraser, of the western grain inspection service, and James Robinson, member of the Board of Grain Commissioners.

For nearly three hours the two officials were bombarded with questions from the floor of the convention hall and were required to explain how grain inspection were done, what field produced wheat of varying grades, the benefits of drying, results of re-inspections, the effect of sowing on the ripening of grain, Canadian wheat, and answer a battery of questions bearing upon the movement of wheat from the time it is shipped to the country elevator until it reaches the export market.

Questions made that the important task of inspecting the wheat of the country was being placed in the hands of incompetent men who often proved to be "poor guessers." To overcome this objection, it was urged that the grain inspection be removed from the agricultural department and not from the civil service.

Replying, Mr. Fraser declared all inspectors were required to pass a rigid examination. In examining the grain, difficulty in estimating suitable men, he pointed out that from a recent list of 60 applicants only 12 had survived the test.

"Trading," Mr. Fraser added, "is primarily a matter of judgment. Naturally every man is judgmental in some way, and whenever the human element enters, there is always the possibility of mistakes. In reaching classification of grain inspected, we are solely guided by the terms of the Canadian Grain Act and our efforts at all times have been to reach some basis of uniformity."

Mr. Fraser deplored the increasing number of varieties of wheat being produced in the country. Fifteen years ago, he said, there were 100 varieties, but now there are 200. He said the grade of wheat had been considerably higher than at present. He expressed the opinion that half a dozen varieties would be quite sufficient.

WAS WAR ACE

Capt. F. J. Stevenson, war ace, arrived from the Orient, and crashed to death in the Far East, when his plane nose-dived into the street.

Asks For Wider Powers

Regulations Governing Soldier Cases Not Flexible Enough

TORONTO.—As a result of the report of Col. A. T. Hunter, on his recent investigation of the Department of Soldiers' Civil Re-settlement here and in Hamilton, London, Ottawa and Montreal, the minister, Hon. Dr. J. H. King, will ask Parliament to grant him wider powers in dealing with the welfare of the veterans, said the Globe recently.

At present the time, it said, the regulations are not flexible enough, so that in certain exceptional cases hardship is undergone by veterans.

Manitoba Will Adopt Immigration Scheme

Bringing Boys From England For Placement On Farms

WINNIPEG.—The British legation has informed the Manitoba provincial government and about 50 Indians will be brought here this year for placement on farms in the Province, Hon. A. Prentiss, Minister of Immigration, has announced.

Meanwhile, the boys will be placed at Manitoba Agricultural College where they will receive training in agriculture to fit them for world.

At last, the consideration of these recommendations, the systems of grain inspection and grading now in vogue in Canada were explained in exhaustive detail by J. D. Fraser, of the western grain inspection service, and James Robinson, member of the Board of Grain Commissioners.

For nearly three hours the two officials were bombarded with questions from the floor of the convention hall and were required to explain how grain inspection were done, what field produced wheat of varying grades, the benefits of drying, results of re-inspections, the effect of sowing on the ripening of grain, Canadian wheat, and answer a battery of questions bearing upon the movement of wheat from the time it is shipped to the country elevator until it reaches the export market.

Questions made that the important task of inspecting the wheat of the country was being placed in the hands of incompetent men who often proved to be "poor guessers." To overcome this objection, it was urged that the grain inspection be removed from the agricultural department and not from the civil service.

Replying, Mr. Fraser declared all inspectors were required to pass a rigid examination. In examining the grain, difficulty in estimating suitable men, he pointed out that from a recent list of 60 applicants only 12 had survived the test.

"Trading," Mr. Fraser added, "is primarily a matter of judgment. Naturally every man is judgmental in some way, and whenever the human element enters, there is always the possibility of mistakes. In reaching classification of grain inspected, we are solely guided by the terms of the Canadian Grain Act and our efforts at all times have been to reach some basis of uniformity."

Mr. Fraser deplored the increasing number of varieties of wheat being produced in the country. Fifteen years ago, he said, there were 100 varieties, but now there are 200. He said the grade of wheat had been considerably higher than at present. He expressed the opinion that half a dozen varieties would be quite sufficient.

Liverpool Greets Canadian Farmers

Miss Cora Hind Replied To Address For Visitors

LIVERPOOL.—The touring Canadian farmers spent 48 hours visiting Liverpool, the Mersey River, and their visit created considerable interest here.

One Liverpool paper says of them, "They are dressed like Englishmen in their dress, and, except for a few words, give themselves up to the party by wearing fur coats."

The farmers were welcomed on the tour exchange by President Harrier, who assured them that Canada's wheat graded as reliable as any in the world.

Miss Cora E. Hind, Winnipeg, replied to the visitors in an address that was widely received with information about the Canadian resources, agriculture and progress.

The visitors were received at the city hall by the Lord Mayor, Miss Margaret Beaven. Short speeches were made by many of the leading Liverpool citizens, and a number of chamber business. Conferences were held in the fruit and general produce exchanges. The party visited the Liverpool Cathedral, of which, after 20 years' absence, only a part had been completed. The cathedral's construction of which may occupy a century.

GRADING SYSTEM FOR WHEAT IS UNDER REVIEW

CALGARY.—Following a debate during a number of hours on the question of grain grading, the Canadian delegation to the Imperial Conference here, by an overwhelming vote declared their opposition to the introduction of measures which might result in the lowering of the standard of Canadian wheat on the markets of the world.

Two resolutions were presented on grain grading. One advocated a division of grades to provide for increased moisture content, "rough A" and "rough B," and to grade grain from 15 to 17 per cent. It was suggested the spread in price be proportional. The other resolution asking the Canadian delegation to support the Canadian Board of Grain Commissioners to arrange a certain amount of damaged grain to go into contract grades two and three. Northern both resolutions were rejected.

Both resolutions of the Canadian delegation to the Imperial Conference here, by an overwhelming vote declared their opposition to the introduction of measures which might result in the lowering of the standard of Canadian wheat on the markets of the world.

Montreal.—The world shortage of hides and leather, which is approaching among famine conditions in some countries, has created a trying and difficult situation for the leather and shoe industry," declared Dr. Roy Weston, manager of the Shoe Manufacturers' Association of Canada, addressing a meeting here.

Speakers, including the president of the Montreal Chamber of Commerce, entreated the government of any country or any industry, have been responsible for the runaway hide and leather markets of recent months.

The speaker added that an increase of 10 per cent. or more in the price of hides and leather was necessary in order to cover the cost resulting from the heavy cost of insurance.

"There is no remedy for the present world shortage of cattle and hides except a period of high prices which will encourage the cattle industry in increased production," he added.

Re-Elected To Presidency

CALGARY.—Unanimous demands of the loyalty of the 800 members of the Canadian Farmers' Association here in their election to the presidency of the United Farmers of Alberta for the third convention here. The candidate of the veterans leader was not opposed. Similarly the United Farmers of Alberta, of Alberta, was re-elected, and their confidence in Mrs. B. Green, who despite protestations, was persuaded to accept the presidency of the U.F.A. for another year.

Survived Popular Accident

REGINA.—To fall into a manhole while engaged in dumping snow, and to be carried through the city's sewage system from upper town to lower town, a distance of about one mile, and to be engulfed in hot water and steam from the Charlton River was the experience of J. Bernard, a corporation employee here. The extent of Bernard's injuries have not yet been ascertained.

Would Be A City

REGINA.—Formal application for the incorporation of the town of Yorkton as a city—the eighth in Saskatchewan—was filed yesterday by Hon. S. C. Stewart, and Town Clerk F. J. Pillington, and accompanied by the usual fee of \$25. The application will receive the consideration of the Lieutenant-Governor-in-Council.

YACONA, N.Y., has had no death from smallpox in 37 years.

BRITISH ENVOY AT OTTAWA IS IN PROSPECT

TORONTO.—In the course of discussions with Mr. Mackenzie King, Ottawa's new minister of agriculture, the matter of sending out of the last Imperial Conference, Right Hon. L. C. M. S. Amery, British Secretary of State for the Dominions, expects to take up the suggestion for the appointment by the Canadian government of a representative to the permanent secretariat in the Canadian capital and in close contact with the Canadian government in Imperial affairs.

Mr. Amery need not necessarily have a title as high sounding as High Commissioner, but he will be in a position to act as a sort of liaison officer for the British government.

Mr. Amery said, and pointed out that the Canadian government had been considered at the last Imperial conference. It was decided by resolution that such a representation between Great Britain and the Dominions would be an excellent thing for the Dominions.

World Shortage Of Leather

Higher Prices To Encourage Cattle Industry Said To Be Only Remedy

MONTREAL.—The world shortage of hides and leather, which is approaching among famine conditions in some countries, has created a trying and difficult situation for the leather and shoe industry," declared Dr. Roy Weston, manager of the Shoe Manufacturers' Association of Canada, addressing a meeting here.

Speakers, including the president of the Montreal Chamber of Commerce, entreated the government of any country or any industry, have been responsible for the runaway hide and leather markets of recent months.

The speaker added that an increase of 10 per cent. or more in the price of hides and leather was necessary in order to cover the cost resulting from the heavy cost of insurance.

"There is no remedy for the present world shortage of cattle and hides except a period of high prices which will encourage the cattle industry in increased production," he added.

STUDYING MARKETS IN EUROPE

Farmers and others interested in agriculture in all parts of Canada are members of the Canadian National Railways' Marketing tour of Europe which is being spread over January and part of February. Of the 98, more than 40 were from Western Canada. This photograph is of a portion of the party which left Winnipeg, and includes E. C. McLean, president of the British Columbia Farmers' Association; Alberta Scott, district agriculturist of the Alberta Government; Sedgewick,

Alta.; J. Haggerly, Alta.; Alvin, Bob; McClelland, Westlock, Alta.; Ed. McConnell, Hamton, Man.; W. J. Pollock and Wm. G. Gubel, of Kenney, Man.; Parker, Perry, Man.; W. M. McLean and J. M. George, Deloraine, Man.; Arthur Fargey, La Riviere, Man.; George Zaitch, special representative of The New-Westminster, Vancouver, British Columbia, and Wm. Wimber, John St. John, Borden, Canadian National Railways' agricultural agent, Winnipeg; and J. S. McLoway, manager of the railways' department in Scotland.

of agriculture and colonization. Although the photograph because they went in advance of the party, are, among others: Hon. George Langley, former president of the Saskatchewan Farmers' Association; and D. W. Warner, ex-M.P. of Edmonton, Alta.; H. S. Arroll, Edmonton, Alta.; Wm. Wimber, John St. John, Borden, Canadian National Railways' agricultural agent, Prince Edward Island. The tourists will visit England as well as England and Scotland.
